Lester Snow

Executive Director, CalFed

1416 Ninth St.

Sacramento, CA 95814

Dear Mr. Snow:

This letter is to address the revised CalFed plan.

I support CalFed's potential conservation goals including removing the dam in Englebright that blocks migrating Salmon and increasing natural flows for fish and recreation.

I suggest that CalFed should explore the different options for water conservation, instead of building new dams and canals. By monitoring water consumption by using water meters for agricultural and urban uses.

Thanks for your time.

Sincerely,

Jason Hunt
